## Anthony Mackey, Providing You Independent Verification Services

### We offer you:

#### DIAGNOSTIC TESTING

We offer assurance that your homes perform efficiently with the help of diagnostic equipment, including a blower door test to evaluate the leakiness of the home envelope and a duct blaster test to gauge the leakiness of the duct system.

#### INFRARED TECHNOLOGY

We use infrared cameras to help you improve quality control and homeowner comfort. Infrared cameras can 'see' what is behind the walls and pinpoint areas where heat and cold are escaping, so they can be sealed and properly insulated.

#### RATINGS BY QUALIFIED HOME ENERGY PROFESSIONALS

We are trained and certified home energy professionals, qualified to provide verification services for EPA's ENERGY STAR program.

#### THERMAL BYPASS CHECKLIST VERIFICATION

We can help you minimize homeowner complaints by verifying that your homes pass ENERGY STAR's new Thermal Bypass Checklist (TBC). "Thermal bypasses" are areas within the home where heat can flow around or through insulation because the insulation is poorly aligned with the air barrier or the air barrier is missing or incomplete.

To earn the government's ENERGY STAR, a home must meet strict energy efficiency guidelines set by the U.S. EPA. ENERGY STAR qualified homes are quieter and more comfortable, have lower utility bills, and help protect the environment by reducing greenhouse gas emissions.
